

Special Issue on Chemometrics

Call for Papers

Chemometrics is the science of extracting information from chemical systems by data-driven means. Chemometrics is inherently interdisciplinary, using methods frequently employed in core data-analytic disciplines such as multivariate statistics, applied mathematics, and computer science, in order to address problems in chemistry, biochemistry, medicine, biology and chemical engineering.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **chemometrics**. Potential topics include, but are not limited to:

- Cheminformatics
- Chemometrical methods
- Applications of chemometrics
- Software development
- Data analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Chemometrics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 20th, 2017
Publication Date	November 2017
