

Special Issue on Research on Reliability and Validity

Call for Papers

Reliability and Validity indicate the ability of a system or method to perform its required functions under stated conditions for a specified period of time. Generally, reliability is necessary conditions of validity but not sufficient condition, and the composition formula “O=T S R” can be used to measure the relationship between validity and reliability. The main impetus for the development of reliability and validity as a discipline was progress in academic achievement, the actual performance, special training results, psychiatric diagnosis, and ranking estimation. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of research on the **research on reliability and validity**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **research on reliability and validity**. Potential topics include, but are not limited to:

- Influence factors of reliability and validity
- Estimation methods of reliability and validity
- Function of reliability and validity
- Reliability and validity analysis
- The dimension of reliability and validity
- Applications of reliability and validity

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Research on Reliability and Validity**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|-----------------|
| Submission Deadline | June 12th, 2014 |
| Publication Date | August 2014 |
