

Special Issue on Medical Statistics

Call for Papers

Medical statistics is a discipline which utilizes the principle and method of probability theory and mathematical statistics combined with medical practice to study the collection, analysis and inference of digital data. Medical statistics cover the applications of statistics in the field of medicine and health sciences, including epidemiology, public health, forensic medicine and clinical studies.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **medical statistics**. Potential topics include, but are not limited to:

- Epidemiology
- Pharmaceutical statistics
- Evidence-based medicine
- Active control trials
- Survival analysis
- Principles of medical statistics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Medical Statistics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 14th, 2018
Publication Date	August 2018
