

Special Issue on Myocardial Research

Call for Papers

Myocardial Protection is often mentioned in extracorporeal circulation operation, In order to reduce the myocardial ischemia anoxia and reperfusion damage and protection measures. As time goes on, researches about the protection occupy a vital position. Its mechanism is very complex, including cells, metabolic, immune and nervous, hormones, growth factors, enzymes and other factors. Reasons, methods, and risk assessment are worth to be discussed and controversial. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **myocardial research**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **myocardial research**. Potential topics include, but are not limited to:

- Myocardial protection
- Myocardial symptoms
- Myocardial treatment
- Cause of myocardial
- Regeneration of heart muscle cells
- Clinical significance

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Myocardial Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 25th, 2014
Publication Date	October 2014
