
Special Issue on Cardiovascular Imaging

Call for Papers

Cardiovascular imaging uses the latest imaging techniques that include echocardiography, CT, CMR, nuclear, optical imaging, and angiography. Sophisticated post-processing techniques provide unprecedented 3- and 4-dimensional visualization of complex cardiovascular anatomy and pathology to facilitate treatment planning for surgical or endovascular procedures.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Cardiovascular Imaging**. Potential topics include, but are not limited to:

- Coronary angiography
- Echocardiography
- Cardiac CT
- Cardiac MRI
- Cardiovascular ultrasound
- Nuclear cardiology
- Venography

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Cardiovascular Imaging**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 31st, 2017
Publication Date	December 2017
