

Special Issue on Myocardial Infarction

Call for Papers

The Myocardial Infarction (MI), commonly known as a heart attack, is a serious medical condition that occurs when the flow of oxygen-rich blood to a section of heart muscle suddenly becomes blocked and the heart can't get oxygen. If blood flow isn't restored quickly, the section of heart muscle will begin to die. Signs of MI include shortness of breath, chest pain, fatigue and cold sweat, etc.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Myocardial Infarction**. Potential topics include, but are not limited to:

- ST elevation MI (STEMI)
- Non-ST elevation MI (NSTEMI)
- Complications of MI
- Pathology of MI
- Thrombolysis in MI
- Signs & symptoms
- Diagnosis & tests
- Treatment & care

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Myocardial Infarction**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 28th, 2017
Publication Date	February 2018
