

Special Issue on Personalized Medicine

Call for Papers

Personalized medicine aims to use new methods of molecular analysis to better manage a patient's disease or predisposition toward a disease. It helps physicians and patients choose the disease management approaches likely to work best in the context of a patient's genetic and environmental profile. Our growing understanding of genetics promote us to use better diagnoses, safer drug prescribing, and more effective treatment of the diseases and conditions. Tailoring health care to a person's unique condition is the idea behind **personalized medicine**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **personalized medicine**. Potential topics include, but are not limited to:

- History of personalized medicine
- Methods of personalized medicine
- Informatics of personalized health
- Personalized medicine in clinical trials
- Cost-benefit issues for personalized medicine
- Ethics in personalized medicine

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Personalized Medicine**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 30th, 2014
Publication Date	November 2014
