## Special Issue on Soil Resources

### Call for Papers

Soil the Earths skin serves many functions. In recent years, scientists and concerned individuals have come to understand that our management of soil resources can have either positive or negative effects on our quality of life. Soil Resources and the Environment provides a very broad-spectrum contextual approach to the many functions of soils, with an emphasis on low external-input sustainable agricultural techniques. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **soil resources**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **soil resources**. In this special issue, potential topics include, but are not limited to:

- Soils and food security
- Soils and water
- Soils and climate regulation
- Soils and human health
- Soil and biodiversity
- Regional trends in the condition of soils
- Global summary of threats to soil functions

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Soil Resources**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 11th, 2019
Publication Date	February 2020
