

Special Issue on Research on Biochemistry

Call for Papers

Biochemistry is the application of chemistry to the study of biological processes at the cellular and molecular level. It emerged as a distinct discipline around the beginning of the 20th century when scientists combined chemistry, physiology, and biology to investigate the chemistry of living systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **research on biochemistry**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **research on biochemistry**. In this special issue, potential topics include, but are not limited to:

- Carbohydrate biochemistry
- Lipid biochemistry
- Protein biochemistry
- Clinical biochemistry
- Nutritional biochemistry and vitaminology
- Environmental biochemistry
- Toxicology and therapeutic drug monitoring
- Immunochemistry

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Research on Biochemistry**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 18th 2020
Publication Date	April 2020
