## Subject Coverage

This journal invites original research and review papers that address the following issues in water resource and protection. Topics of interest include, but are not limited to:

- Economic, sociological, and environmental considerations of water resources and sustainable use of water resources
- Innovative technologies and engineering solutions for water resources protection
- Monitoring, modeling and prediction of water pollution (watershed, lakes, rivers, estuaries, and coasts)
- Sea water utilization
- Surface and ground water systems and water pollution

- control
- Water management automation system
- Water purification and wastewater treatment (mechanical, biological, chemical, and other treatments)
- Water resources and climatic change
- Water resources conservation
- Water resources protection and sustainable use
- Water resources restoration and management
- Water resources study and water quality assessment

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the JWARP.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
