Wireless Engineering and Technology is an international journal dedicated to the latest advancement of wireless engineering and technology. The goal of this journal is to provide a platform for scientists, students, academics and engineers all over the world to promote, share, and discuss various new issues and developments in different areas of wireless engineering and technology.

## Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- |  |   |
|--|---|
| • Antenna Systems and Radio Frequency (RF) Engineering | • Terahertz and Infrared Technology and Engineering |
| • Body Area Networks and Its Applications              | • Vehicular Communications and Networks             |
| • Broadband Wireless Access Techniques                 | • Wireless Air Interface and Link Control           |
| • Cognitive Radio and Software Defined Radio           | • Wireless Channel Modeling and Propagation         |
| • Microwave and Millimeter Wave Theory and Techniques  | • Wireless Multimedia Communications and Computing  |
| • Multi-User and Multiple Access Schemes               | • Wireless Power Transmission                       |
| • Optical Wireless Communications                      | • Wireless Sensor Networks                          |
| • Radio Network Planning and Optimization for UMTS     | • Wireless System Architectures and Applications    |
| • Radio Resource Management and Interference Control   | • Wireless Traffic and Routing                      |

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the **WET**.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
