

Table of Contents

Volume 7 Number 4

December 2017

Second Kind Shifted Chebyshev Polynomials for Solving the Model Nonlinear ODEs

A. M. S. Mahdy, N. A. H. Mukhtar.....391

Some Exact Solutions of Generalized Jeffrey Fluid Using N-Transform

A. Khan, G. Zaman, S. Ahmad, M. I. Chohan.....402

Numerical Method for Solving Electromagnetic Wave Scattering by One and Many Small Perfectly Conducting Bodies

N. T. Tran.....413

Numerical Method for Solving Electromagnetic Scattering Problem by Many Small Impedance Bodies

N. T. Tran.....435

Simple Method for Evaluating Singular Integrals

N. T. Tran.....444

Construction of Global Weak Entropy Solution of Initial-Boundary Value Problem for Scalar Conservation Laws with Weak Discontinuous Flux

Y. H. Dai, J. Zhang.....451

Comparison of Numerical Approximations of One-Dimensional Space Fractional Diffusion Equation Using Different Types of Collocation Points in Spectral Method Based on Lagrange's Basis Polynomials

M. H. Nova, H. U. Molla, S. Banu.....469

Applications of Potential Theoretic Mother Bodies in Electrostatics

N. T. Tran.....481

Global Analysis of Solutions of a New Class of Rational Difference Equation

O. Moaaz, E. M. Elabbasy, S. Alsaed.....495
