## Editor-in-Chief

**Prof. Christian Corda**

Section of Physics of Santa Rita School of Advanced  
Academic Studies and Research, Italy

## Editorial Board

**Dr. Kazuharu Bamba**

Fukushima University, Japan

**Dr. Andrew Beckwith**

Department of physics, PRC (visiting scholar) Chongqing University,  
USA

**Dr. Alexander Burinskii**

Laboratory of Theoretical Physics in Nuclear Safety Institute of the  
Russian Academy of Sciences, Russia

**Prof. Farhad Darabi**

Azərbaycan Şahid Mədanı University, Iran

**Dr. Luca Fabbri**

University of Bologna, Italy

**Dr. Seyed Hossein Hendi**

Shiraz University, Iran

**Dr. Huda E. Khalid**

Mosul University, Iraq

**Dr. Lino Miramonti**

Università degli Studi di Milano, Italy

**Dr. Hooman Moradpour**

Research Institute for Astronomy and Astrophysics of Maragha  
(RIAAM), Iran

**Prof. Jorge Ovalle**

Simón Bolívar University, Venezuela

**Prof. Waldyr A. Rodrigues Jr.**

Institute of Mathematics, Statistics and Scientific Computation State  
University of Campinas (UNICAMP), Brazil

**Prof. Matteo Luca Ruggiero**

DISAT, Polytechnic University of Turin, Italy

**Dr. Burra Gautam Sidharth**

International Institute of Applicable Mathematics & Information  
Sciences B.M. Birla Science Centre, India

**Dr. Anirvan Sircar**

Intel Corporation, USA

**Dr. Lorenzo Zaninetti**

Department of Physics, Italy

# Table of Contents

**Volume 6    Number 3**

**July 2020**

## **Quantum Gravity, Constant Negative Curvatures, and Black Holes**

J. R. Klauder.....313

## **Note on the Formation of Supermassive Black Holes**

K. Dalton.....321

## **Hypotheses on Vacuum and Elementary Particles: The Friedmann-Planck Micro-Universe, Friedmann and Schwarzschild Photon Spheres**

R. Fèvre.....324

## **Electron Shape and Structure: A New Vortex Theory**

N. Butto.....340

## **Why Gravity a Weak Force of Nature**

K. Chandra.....353

## **New Mechanism and Analytical Formula for Understanding the Gravity Constant $G$**

N. Butto.....357

## **The Theoretical Value of Mass of the Light $\eta$ -Meson via the Quarks' Geometric Model**

G. Guido.....368

## **The Theoretical Spectrum of Mass of the Light Mesons without Strangeness via the Quarks' Geometric Model**

G. Guido.....388

## **How to Obtain a Mass of a Graviton, and Does This Methodology Lead to Voids?**

A. W. Beckwith.....416

## **The Explosion at the Center of Our Galaxy**

K. Dalton.....440

## **Pauli Principle, Inflation and Simple Statistical Treatment of Free-Fermions**

A. Plastino, M. C. Rocca, G. Ferri.....443

## **The Final Size of the Universe Based on the Elasticity of the Fabric of Spacetime**

G. Douglas, N. S. Bajaj.....450

**New Theory to Understand the Mechanism of Gravitation**

N. Butto.....462

**A Different Cosmology—Thoughts from Outside the Box**

J. C. Botke.....473

## Journal Information

### SUBSCRIPTIONS

The *Journal of High Energy Physics, Gravitation and Cosmology* (Online at Scientific Research Publishing, <https://www.scirp.org/>) is published quarterly by Scientific Research Publishing, Inc., USA.

#### Subscription rates:

Print: \$39 per issue.

To subscribe, please contact Journals Subscriptions Department, E-mail: [sub@scirp.org](mailto:sub@scirp.org)

### SERVICES

#### Advertisements

Advertisement Sales Department, E-mail: [service@scirp.org](mailto:service@scirp.org)

#### Reprints (minimum quantity 100 copies)

Reprints Co-ordinator, Scientific Research Publishing, Inc., USA.

E-mail: [sub@scirp.org](mailto:sub@scirp.org)

### COPYRIGHT

#### Copyright and reuse rights for the front matter of the journal:

## Journal of High Energy Physics, Gravitation and Cosmology

ISSN Print: 2380-4327    ISSN Online: 2380-4335  
<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

### Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
