Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Dr. Kazuharu Bamba

Fukushima University, Japan

Dr. Andrew Beckwith

Department of physics, PRC (visiting scholar) Chongqing University,
USA

Prof. Elmo Benedetto

Department of Computer Science, University of Salerno, Italy

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Mosul University, Iraq

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jorge Ovalle

Simón Bolívar University, Venezuela

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 7 Number 1

January 2021

Redshift Anomaly on the Solar Disk as Multiple Interactions between Photons and Electrons

A. Trinchera.....1

Spherical Symmetric Solitons of Interacting Spinor, Scalar and Gravitational Fields in General Relativity

J. Edou, A. Adomou, S. Massou.....52

A New Unified Electro-Gravity Theory for the Electron, and the Fundamental Origin of the Fine Structure Constant and the Casimir Effect

N. K. Das.....66

The Unification of Classical and Quantum Gravity

J. R. Klauder.....88

Pivotal Role of Spin in Celestial Body Motion Mechanics: Prelude to a Spinning Universe

P. K. Raghuprasad.....98

Theoretical Spectrum of Mass of the Nucleons: New Aspects of the QM

G. Guido.....123

Determination of the Energy of a Primary Particle in Accordance with the Hypothesis of Primary Particles and Another Meaning of Planck Mass

S. Spremo.....144

Does the Penrose Suggestion as to Black Holes from a Prior Universe Showing Up in Today's Universe Have Credibility? Examined from a Singular, and Nonsingular Beginning of Cosmological Expansion

A. W. Beckwith.....149

Dark Energy, Dark Matter, and the Multiverse

A. Irani.....172

Law of Physics 20th-Century Scientists Overlooked (Part 4): Mass Extinction by Aether Deprivation

C. Ranzan.....191

Revealing the Essence of Electric Permittivity Constant

N. Butto.....210

A Unified Combination of Classical and Quantum Systems

J. R. Klauder.....218

Quagnetic Field Part (I)

B. A. Joshi.....228

Quagnetic Field Part (II)

B. A. Joshi.....276

The Lithium Problem—The Excess Isn't Missing; It Was Never There

J. C. Botke.....320

The Origin and Nature of the Planck Constant

N. Butto.....324

Big Bang Nucleosynthesis in Carmeli Cosmology—Mass Density, Temperature and Expansion Rate of the Early Universe

F. J. Oliveira.....333

Unification of Gravitational and Electromagnetic Fields Using Gauge Symmetry

Y. H. Yun, K. Jang, Y. K. Sung.....344

Affine Quantization on the Half Line

L. Gouba.....352

Journal of High Energy Physics, Gravitation and Cosmology

<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
