Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Dr. Kazuharu Bamba

Fukushima University, Japan

Dr. Andrew Beckwith

Department of physics, PRC (visiting scholar) Chongqing University,
USA

Prof. Elmo Benedetto

Department of Computer Science, University of Salerno, Italy

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Maria Emília Xavier Guimarães

Instituto de Física, Universidade Federal Fluminense, Brazil

Dr. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Mosul University, Iraq

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

Department of Applied Sciences (DSA) University of Québec in
Chicoutimi, Canada

Prof. Christopher Pilot

Gonzaga University, Spokane, WA, USA

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 7 Number 2

April 2021

High Index SMES Device for Gravitomagnetic Field Generation

G. V. Stephenson.....367

From the Big Bang to the Big Rip: One Cycle of a Closed Granular Friedmann-Planck Universe

R. Fèvre.....377

Hecke-Langlands Duality and Witten's Gravitational Moonshine

I. Yu. Potemine.....391

Calculating the Cosmological Constant, and a Minimal Time Step, for Our Present Universe. In Fidelity to the Topics Spoken as a Presenter in the Zeldovich 4 Conference, September 11, 2020

A. W. Beckwith.....403

Comment on "Analyses of Mössbauer Experiments in a Rotating System: Proper and Improper Approaches" [Annals of Physics Volume 418, July 2020, 168191]

J. Foukzon.....416

How the Narlikar Argument of Quantum Gravity Can Be Combined with the Cosmological Constant We Calculated to Obtain Quantum Gravity Effects for Planck Length Values, as Opposed to 2 Times Planck Length Values

A. Beckwith.....445

Dark Matter as Past Matter, a Conjecture

P. Perrucci.....452

Matter-Antimatter Annihilation

A. Irani.....474

Does Space Have a Gravitational Susceptibility? A Model for the Λ CDM Density Parameters in the Friedmann Equation

C. Pilot.....478

Hypersphere World-Universe Model: Evolution of the World

V. S. Netchitailo.....508

Anomalies in the Counts of Low Redshift Quasars

D. P. Youll.....531

On the Possibility of Describing the Origin of the Big Bang According to the Hypothesis of Primary Particles

S. Spremo.....551

A Solution of the Cosmological Constant, Using Multiverse Version of Penrose CCC Cosmology, and Enhanced Quantization Compared

A. Beckwith.....559

A New Hypothesis on the Dark Matter

A. Bianchi, G. Guido.....572

QED-Like Simple High Order Perturbative Relation between the Gravitational Constant G and the Planck Constant \hbar

M. Kalinski.....595

Can the Standard Model Predict a Minimum Acceleration That Gets Rid of Dark Matter?

E. G. Haug.....602

Gravitational Waves in a Universe with Time-Varying Curvature

J. C. Botke.....607

Q-Theory: A Connection between Newton's Law and Coulomb's Law?

C. Pilot.....632

The Principle of Equivalence: Periastron Precession, Light Deflection, Binary Star Decay, Graviton Temperature, Dark Matter, Dark Energy and Galaxy Rotation Curves

F. J. Oliveira.....661

Non-Detection of Dark Matter Particles: A Case for Alternate Theories of Gravity

C. Sivaram, K. Arun, A. Prasad, L. Rebecca.....680

H , W , Z Bosons, Dark Matter: Composite Particles?

R. Fèvre.....687

Multifrequency Gravitational Wave Background from Continuous Sources

C. Sivaram, A. Kenath.....698

Hypersphere World-Universe Model

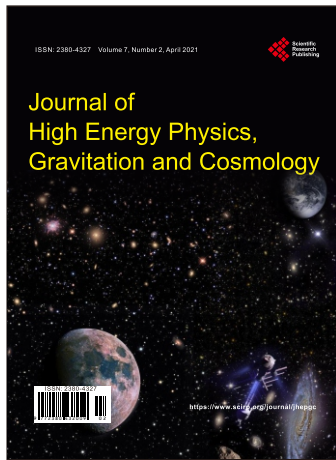

V. S. Netchitailo.....715

Variable Speed of Light with Time and General Relativity

G. Pipino.....742

The Nature and Origin of Inertia

N. Butto.....761

Journal of High Energy Physics, Gravitation and Cosmology

<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
