

TABLE OF CONTENTS

Volume 2 Number 4

December 2012

Application for Superconvergence of Finite Element Approximations for the Elliptic Problem by Global and Local L^2-Projection Methods	
R. H. Jari, L. Mu.....	249
Optimal Recovery of Holomorphic Functions from Inaccurate Information about Radial Integration	
A. DeGraw.....	258
Nonconforming H^1-Galerkin Mixed Finite Element Method for Pseudo-Hyperbolic Equations	
Y. D. Zhang, Y. Q. Niu, D. W. Shi.....	269
Applying the Wiener-Hermite Random Technique to Study the Evolution of Excess Weight Population in the Region of Valencia (Spain)	
J.-C. Cortés, J.-V. Romero, M.-D. Roselló, R.-J. Villanueva.....	274
Effective Solution of Riemann Problem for Fifth Order Improperly Elliptic Equation on a Rectangle	
S. M. Ali Raeisian.....	282
Face Recognition from Incomplete Measurements via ℓ_1-Optimization	
M. Argaez, R. Sanchez, C. Ramirez.....	287
Feynman Formulas Representation of Semigroups Generated by Parabolic Difference-Differential Equations	
V. Sakbaev, A. Yaakbarieh.....	295
Super-Resolution with Multiselective Contourlets	
M. El Aallaoui, A. Gouch.....	302
Numerical Solution of Generalized Abel's Integral Equation by Variational Iteration Method	
R. N. Prajapati, R. Mohan, P. Kumar.....	312
An Inclusion-Exclusion Algorithm for Network Reliability with Minimal Cutsets	
Y.-R. Sun, W.-Y. Zhou.....	316
Designing Optical Fibers: Fitting the Derivatives of a Nonlinear PDE-Eigenvalue Problem	
L. Kaufman, S.-M. Bang, B. Heacock, W. Landon, D. Savacool, N. Woronekin.....	321
Modelling the Cavity of Continuous Chemical Lasers (CCLs) Using Matlab Applications	
M. Ferhat, Z. Belgacem, B. Said.....	331
Research on Algorithm of the Point Set in the Plane Based on Delaunay Triangulation	
B. Yang, S. Y. Shang.....	336
A New Block-Predictor Corrector Algorithm for the Solution of $y''' = f(x, y, y', y'')$	
A. O. Adesanya, M. O. Udo, A. M. Alkali.....	341
Strong Convergence of a New Three Step Iterative Scheme in Banach Spaces	
R. Chugh, V. Kumar, S. Kumar.....	345
On Elliptic Curves with Everywhere Good Reduction over Certain Number Fields	
S. Yokoyama.....	358
