TABLE OF CONTENTS

Volume 3 Number 4

October 2013

Thermodynamic Interpretation of the Morphology Individuality of Natural and Synthesized Apatite Single Crystals

T. Suzuki, H. Takemae, M. Yoshida.....119

Synthesis, Growth, Crystal Structure and Characterization of the o-Toluidinium Picrate

K. M. Priyadarshini, A. Chandramohan, T. U. Devi.....123

Bulk Growth and Characterization of D-(-)-Alanine Single Crystals

K. Moovendaran, S. Natarajan.....130

Crystallization in the Three-Component Systems $\text{Rb}_2\text{SO}_4\text{-MSO}_4\text{-H}_2\text{O}$ (M = Mg, Co, Ni, Cu, Zn) at 298 K

V. Karadjova, D. Stoilova.....136

Effect of Substituent Position on the Properties of Chalcone Isomer Single Crystals

R. Gandhimathi, G. Vinitha, R. Dhanasekaran.....148

Neutron Diffraction Study of Self-Curing and Self-Crystallization Phenomena of Low-Temperature Dehydrogenating Products of Powder Crystals of Rare-Earth Metals Trihydroxides

K. Irisali.....156

Recrystallization Kinetics and Microstructure Evolution of Annealed Cold-Drawn Low-Carbon Steel

N. A. Raji, O. O. Oluwale.....163

Decomposition of Solutions in Front of the Interface Induced by Directional Crystallization

A. Guskov, L. Nekrasova.....170

The figure on the front cover is from the article published in *Journal of Crystallization Process and Technology*, 2013, Vol. 3, No. 4, pp. 123-129 by Kandasamy Mohana Priyadarshini, *et al.*

Call for Papers

Journal of Crystallization Process and Technology (JCPT)

ISSN 2161-7678 (Print) ISSN 2161-7686 (Online)
<http://www.scirp.org/journal/jcpt>

Journal of Crystallization Process and Technology (JCPT) is an international, specialized, English-language journal devoted to publication of original contributions concerning with the crystallization process, studies and properties of the crystalline materials.

Aims & Scope

Journal of Crystallization Process and Technology (JCPT) is an international, specialized, English-language journal devoted to publication of original contributions concerning with the crystallization process, studies and properties of the crystalline materials. It covers the basic sciences, engineering aspects and applied technology of crystals and crystallization processes, both the experimental and theoretical aspects including physical, chemical, and biological phenomena and processes related to the design, growth, and application of crystalline materials. The journal publishes original papers including but not limited to the following fields:

- Apparatus, Instrumentation and Techniques for Crystal Growth, and Purification Methods
- Biological Substances Crystallization
- Biomineralization
- Characterization by Physical and Chemical Methods
- Crystallization as Bulk or Thin Films
- Crystallization in Polymers, Liquid Crystals Crystallization in Sol-Gel Glasses and Viscous Media
- Crystallization Processes Including among Others Chemical Vapor Deposition, Hydrothermal, Organic, Solvent and Solvent-Free Processes
- Crystals Growth, Design and Properties for Applications in Medical Sciences with Organic
- Intermolecular Interactions in the Solid State
- Modeling of Crystal Growth Processes
- Nucleation Theory
- Opto-Electronics with Semiconductors, Superconductors, Magnetics, Inorganic Inorhanic-Organic Hybrid Materials Crystallization
- Transport Phenomena in Crystal Growth

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
