TABLE OF CONTENTS

Volume 4 Number 1 February 2014

Logarithm of a Function, a Well-Posed Inverse Problem
S. R. Mora, V. A. C. Barriguete, D. G. Aguilar……1
Inverse Bayesian Estimation of Gravitational Mass Density in Galaxies from Missing Kinematic Data
D. Chakrabarty, P. Saha……6
Inverse Problem on Heat Conduction in Heterogeneous Medium
A. Schwab……30
On the Generalization of Seismic Tomography Algorithms
M. Dobróka, H. Szegedi……37

The figure on the front cover is from the article published in American Journal of Computational Mathematics, 2014, Vol. 4, No. 1, pp. 30-36 by Albert Schwab.

Call for Papers

American Journal of Computational Mathematics (AJCM)

ISSN: 2161-1203(Print) 2161-1211(Online)
http://www.scirp.org/journal/ajcm

American Journal of Computational Mathematics **(AJCM)** is a journal dedicated to providing a platform for publication of articles about mathematical research in areas of science where computing plays a central and essential role emphasizing algorithms, numerical methods, and symbolic methods.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Computational Geometry
- Computational Linguistics
- Computational Science
- Computer-Assisted Research
- Computer Simulation
- Mathematics of Scientific Computation
- Numerical Methods
- Stochastic Methods
- Symbolic Computation and Computer Algebra Systems

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of *American Journal of Computational Mathematics*.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- •High visibility for maximum global exposure with open access publishing model
- •Rigorous peer review of research papers
- •Prompt faster publication with less cost
- •Guaranteed targeted, multidisciplinary audience
