This Journal is aimed at publishing original articles with visual images which will demonstrate facts to assist in the understanding of the presented information. Each article submitted should not have been published before nor simultaneously submitted for publication elsewhere.

## Subject Coverage

JFCMV is a quarterly online international journal. This journal will cover a wide range of experimental and computational articles in the fields of flow control, measurement and visualization. The fields include topics related to acoustics, aeronautics, biomedical and life sciences, combustion, fluid mechanics, heat transfer, hydraulics, micro and nano fluids, multiphase flow, ocean and wind engineering, optical measurement, safety management technology, scientific arts, sports science, turbo machinery, turbulence, visual information, and others.

Three types of articles will be considered for publication in the Journal:

**Original Paper:** Original publications on the subjects of flow control, measurement and visualization are encouraged to submit if they contain a sufficient amount of visual images.

**Review Paper:** Reviews on the topics in the fields of this Journal are encouraged to submit, if they contain a sufficient amount of visual images.

**Short Paper:** Rapid publications of original research in a short form are encouraged to submit, if they contain a sufficient amount of visual images.

Since the Journal focuses on publishing visual experimental and computational data, visual images are important factors for publication consideration.
