SGRE is an international refereed journal dedicated to the latest advancement of **Smart Grid and Renewable Energy**. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these fast moving areas.

Subject Coverage

This journal invites original research and review papers that address the following issues in **Smart Grid and Renewable Energy**. Topics of interest include, but are not limited to:

- ★ Bio-energy technologies, process and utilization
- ★ Concept and structure frame of smart grid
- ★ Development of smart grid
- ★ Environmental-friendly technologies for power generation
- ★ Geothermal and tidal wave energy
- ★ Hydropower technologies and applications
- ★ Information and smart meter reading
- ★ Integrated energy and communications
- ★ New technologies and design for energy efficiency
- ★ New technologies for minimizing CO₂ generation
- ★ Photovoltaic for solar power applications
- ★ Power system analysis and optimization
- ★ Wind power generation and utilization

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the **SGRE**.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
