Editor-in-Chief

Prof. Wen-Xiu Ma

University of South Florida, USA

Editorial Board

Dr. Izhar Ahmad	King Fahd University of Petroleum and Minerals, Saudi Arabia
Dr. S. Joseph Antony	University of Leeds, UK
Prof. Roberto Oscar Aquilano	Instituto de Física Rosario, IFIR (CONICET-UNR), Argentina
Prof. Ping-Hei Chen	National Taiwan University, Chinese Taipei
Prof. Wanyang Dai	Nanjing University, China
Prof. Beih El-Sayed El-Desouky	Mansoura University, Egypt
Prof. Chaudry Masood Khalique	North-West University, South Africa
Dr. Ki Young Kim	Samsung Advanced Institute of Technology, South Korea
Prof. Xiang Li	Beijing University of Chemical Technology, China
Dr. Jafar Fawzi Mansi AlOmari	Al-Balqa' Applied University, Jordan
Prof. Rosa Pardo	Complutense University of Madrid, Spain
Prof. Sanzheng Qiao	McMaster University, Canada
Dr. Daniele Ritelli	University of Bologna, Italy
Dr. Babak Daneshvar Rouyendegh	Atilim University, Turkey
Prof. Nickolas S. Sapidis	University of Western Macedonia, Greece
Prof. Morteza Seddighin	Indiana University East, USA
Dr. Marco Spadini	University of Florence, Italy
Dr. Divine Tito Fongha Wanduku	Keiser University, USA
Prof. Ping Wang	Penn State University Schuylkill., USA
Prof. Xiaohui Yuan	Huazhong University of Science and Technology, China

Table of Contents

Volume 2 Number 7

June 2014

Formation Processes of Zinc Excimer Thin Films Due to Ion-recombination Processes

L. Chen, S. Yamashita, M. Hamasaki, H. Manaka, K. Obara.....449

The Mathematics of Harmony, Hilbert's Fourth Problem and Lobachevski's New Geometries for Physical World

A. Stakhov, S. Aranson.....457

The Case of Nonzero Initial Conditions in the Evolution of the Charge Density Distribution Function for a Spherically Symmetric System

B. I. Sadovnikov, A. A. Zhavoronkov.....495

Some Results on Riemannian Multiple Barycenters

M. Zahri, N. Khallaf.....503

Determination of Flow Structure in a Gold Leaching Tank by CFD Simulation

C. P. K. Dagadu, Z. Stegowski, L. Furman, E. H. K. Akaho, K. A. Danso.....510

Electrical Resistivity Survey for Predicting Aquifer at Onicha-Ugbo, Delta State, Nigeria

Ruth E. Iserhien-Emekeme.....520

On the Existence and Uniqueness of Solutions for Nonlinear System Modeling Three-Dimensional Viscous Stratified Flows

A. Giniatouline, T. Castro.....528

The SABR Model: Explicit Formulae of the Moments of the Forward Prices/Rates Variable and Series Expansions of the Transition Probability Density and of the Option Prices

L. Fatone, F. Mariani, M. C. Recchioni, F. Zirilli.....540

Theory of Dynamic Interactions: The Flight of the Boomerang

G. Barceló.....569

Steffensen-Type Method of Super Third-Order Convergence for Solving Nonlinear Equations

Z. L. Liu, H. Zhang.....581

The Modified Kadomtsev-Petviashvili Equation with Binary Bell Polynomials

N. N. Hu, S. F. Deng.....587

Modifications on the Strand's Sampling Method Applied to Stands of *Pinus elliottii* Engelm

S. P. Netto, D. A. Brena, Â. A. Ebling, A. L. Rodrigues.....593

Lie Symmetries, 1-Dimensional Optimal System and Optimal Reductions of $(1 + 2)$ -Dimensional Nonlinear Schrödinger Equation

M. R. Mu, C. L. Temuer.....603

The Effect of Time-Stepping on the Accuracy of Green Element Formulation of Unsteady Convective Transport

O. O. Onyejekwe.....621

From Chern-Simon, Holography and Scale Relativity to Dark Energy

M. S. El Naschie.....634

The Periodic Solitary Wave Solutions for the (2 + 1)-Dimensional Fifth-Order KdV Equation

X. H. Meng.....639

Control Schemes to Reduce Risk of Extinction in the Lotka-Volterra Predator-Prey Model

J. Li.....644

Application of the Two Nonzero Component Lemma in Resource Allocation

M. Seddighin.....653

Modelling Turbulent Heat Transfer in a Natural Convection Flow

C. Zimmermann, R. Groll.....662

Exact Solutions to the Generalized Benjamin Equation

H. Gao, G. H. Di.....671

Lie Symmetries, One-Dimensional Optimal System and Optimal Reduction of (2 + 1)-Coupled Nonlinear Schrödinger Equations

A. Li, C. L. Temuer.....677

Analytical Solutions of Fukui-Ishibashi (FI) Model and Quick-Start (QS) Model

S. Kukida, J. Tanimoto, N. Ikegaya, A. Hagishimaors.....691

Analysis on a Mathematical Model for Tumor Induced Angiogenesis

R. C. Ewool, Z. Sinkala.....698

Movement and Heat Transfer of Particles in Inhomogeneous and Nonisothermal Rapidly Oscillating Fluid Flow

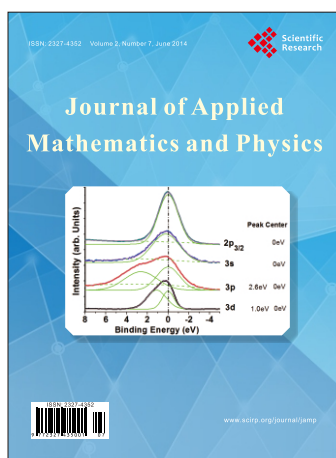

I. Derevich, O. Soldatenko.....708

Solving a Traveling Salesman Problem with a Flower Structure

G. Martino.....718

Simplex Optimization and Its Applicability for Solving Analytical Problems

A. M. Michałowska-Kaczmarczyk, T. Michałowski.....723

Journal of Applied Mathematics and Physics is an international journal dedicated to the latest advancement of applied mathematics and physics. The goal of this journal is to provide a platform for researchers and scientists all over the world to promote, share, and discuss various new issues and developments in different areas of applied mathematics and physics. We aim to publish high quality research articles in terms of originality, depth and relevance of content, and particularly welcome contributions of interdisciplinary research on applied mathematics, physics and engineering.

Subject Coverage

The journal publishes original papers including but not limited to the following fields:

- Applications of Systems
- Applied Mathematics
- Applied Non-Linear Physics
- Applied Optics
- Applied Solid State Physics
- Biophysics
- Computational Physics
- Condensed Matter Physics
- Control Theory
- Cryptography
- Differentiable Dynamical Systems
- Engineering and Industrial Physics
- Experimental Mathematics
- Fluid Mechanics
- Fuzzy Optimization
- Geophysics
- Integrable Systems
- Laser Physics
- Methodological Advances
- Multi-Objective Optimization
- Nanoscale Physics
- Nonlinear Partial Differential Equations
- Non-Linear Physics
- Nuclear Physics
- Numerical Computation
- Optical Physics
- Portfolio Selection
- Riemannian Manifolds
- Scientific Computing
- Set-Valued Analysis
- Soliton Theory
- Space Physics
- Symbolic Computation
- Topological Dynamic Systems
- Variational Inequality
- Vector Optimization

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including but not limited to the above materials, techniques and studies. Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
