**Advances in Linear Algebra & Matrix Theory (ALAMT)** is an international journal dedicated to the latest advancement of linear algebra. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Linear Algebra.

### Subject Coverage

The journal publishes original papers including but not limited to the following fields:

- |   |                                 |
|---|---------------------------------|
| Linear Algebra and Its Applications         | • Solutions of Linear Equations |
| Linear Algebra in Engineering and Computing | • Special Types of Matrices     |
| Matrix Theory and Its Applications          | • Spectral Theory               |
| Numerical Linear Algebra with Applications  |                                 |

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

### Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submission, please access the website.
