Table of Contents

Volume 5 Number 3 July 2015

Plasma Treatment for Preparing Durable Water Repellent and Anti-Stain Synthetic Fabrics for Automotive Applications

N. De Vietro, L. Belforte, V. Lambertini, B. Placenza, F. Fracassi.....103

Influence of Wettability and Mechanical Properties on Tribological Performance of DLC Coatings under Water Lubrication

C. Q. Zhang, M. Fujii.....110

Effects of Laser Hardening Process Parameters on Case Depth of 4340 Steel Cylindrical Specimen—A Statistical Analysis

N. Barka, A. El Ouafi.....124

Erosion Behavior of AISI 6061-T6

J. R. Laguna-Camacho, H. Martínez-García, F. Escamilla-Rodríguez, C. Alarcón-Rosas, C. M. Calderón-Ramón, L. Ríos-Velasco, M. Pelcastre-Lozano, Á. Casados-Sánchez, M. González-Gómez.....136

Experimental Study on Solvent Extraction of Quseir Oil Shale in Egypt

E. Nassef, A. Soliman, R. A. Al-Alla, Y. Eltaweel.....147

Adsorption of CO, CO_2, NO and NO_2 on Boron Nitride Nanotubes: DFT Study

A. A. El-Barbary, Kh. M. Eid, M. A. Kamel, H. O. Taha, G. H. Ismail.....154

The Surface Reactivity and Electronic Properties of Small Hydrogenation Fullerene Cages

A. A. El-Barbary.....162

The figure on the front cover is from the article published in Journal of Surface Engineered Materials and Advanced Technology, 2015, Vol. 5, No. 3, pp. 136-146 by Juan Rodrigo Laguna-Camacho, *et al*.

Call for Papers

Journal of Surface Engineered Materials and Advanced Technology (JSEMAT)

ISSN Print: 2161-4881 ISSN Online: 2161-489X
http://www.scirp.org/journal/jsemat

Journal of Surface Engineered Materials and Advanced Technology **(JSEMAT)** is an international, specialized, English-language journal devoted to publication of original contributions concerning surface sciences, surface properties, techniques of characterization and generated applications.

It is an open-access, peer-reviewed journal describing scientific and technological advances that cover the basic sciences, engineering aspects and applied technology of surface chemistry, surface materials sciences and engineering studies for applications in nanotechnology, biomaterials, optics, environment, architectural restoration including all kind of materials surfaces.

Subject Coverage

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including but not limited to:

- Adsorption Process and Principles
- Advances in Adhesion Sciences
- Interface Sciences and Applications
- Intermolecular Interactions
- Kinetics and Thermodynamics at Surfaces
- Modeling Theory of Surface Chemistry
- Single Molecule Force Spectroscopy
- Surface Biocompatibility
- Surface Characterization and Advanced Techniques
- Surface Corrosion
- Surface Crystallization
- Surface Hydration at Solid/Liquid Interface
- Surface Interactions at Bio-Interfaces
- Surface Interactions at the Nanoscale
- Surface Microscopy (SEM, AFM, High Speed AFM, STM...)
- Surface Molecules Self-Assembly
- Surface Nanopatterning

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy. It will be available through http://www.scirp.org/journal/jsemat/.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
