*Journal of Biophysical Chemistry (JBPC)* is an international journal dedicated to the latest advancement in related research fields. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different aspects of biophysical chemistry.

## Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

Biomolecular and Drug Databases  
Biomolecular Free Energy  
Biomolecular Modeling  
Biomolecular Structure  
Computational Biology  
Computational Chemistry  
Covering Dynamics  
Gene Regulation  
Graph/Network Theory  
Medicine and Neuroscience  
Molecular Docking  
Molecular Dynamics Simulation  
Molecular Evolutionary Genetics

Neural Networks  
Nucleic Acid Structure  
Patch Clamping  
Pharmacology and Physiology  
Quantum Chemistry  
Sequence Alignment  
Single Protein Dynamics  
siRNA  
Soft Matter Physics  
Stochastic Processes  
Structural Alignment  
Structural Biology  
Structure-Activity Relationships

We are also interested in: 1) Short Reports – 2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews – Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

## What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

## What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
