The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of discrete mathematics.

### Subject Coverage

The journal publishes original papers including but not limited to the following fields:

- Algebra
- Calculus of finite differences, discrete calculus or discrete analysis
- Combinatorics
- Discretization
- Discrete analogues of continuous mathematics
- Hybrid discrete and continuous mathematics
- Information theory
- Game theory, decision theory, utility theory, social choice theory
- Geometry
- Graph theory
- Logic
- Number theory
- Operations research
- Probability
- Set theory
- Theoretical computer science
- Topology

We are also interested in: 1) Short Reports – 2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews – Comments and critiques.

### Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website.
