Special Issue on Zeolites and Molecular Sieves

Call for Papers

The family of molecular sieves such as zeolites has been greatly extended and many advances have recently been achieved in the field of molecular sieves synthesis and related porous materials. They are widely used in adsorption, separations, water softening, and catalysis, ion exchange, etc.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Zeolites and Molecular Sieves**. Potential topics include, but are not limited to:

- Zeolites, active carbon, clays, and silica gel
- Synthesis, characterization and applications
- Microporous and mesoporous materials
- Separation and extraction
- Used as adsorbents and catalysts

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly specify the "Special Issue" under your manuscript title. The research field "Special Issue - Zeolites and Molecular Sieves" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 18th, 2016
Publication Date	October 2016
