

Special Issue on Chemical Kinetics

Call for Papers

Chemical kinetics involves the experimental study of reaction rates in order to infer about the kinetic mechanisms for chemical conversion of reactants into products. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Chemical Kinetics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Chemical Kinetics**. In this special issue, potential topics include, but are not limited to:

- Factors that affect reaction rates
- Rates in terms of concentrations
- Reaction rates and stoichiometry
- Concentration and rate
- Reaction mechanisms
- Chemical kinetics for fuel combustion
- Synthesis, evaluation, and kinetic assessment
- Chemical kinetics and mechanisms of complex systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Chemical Kinetics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 10th 2022
Publication Date	May 2022
