

## Special Issue on Insect Morphology

### Call for Papers

**Insect morphology** is a subject that studies the structure, function, origin and evolution of insects. There is enormous variation in body structure amongst insect species. And because of the long-term evolution of insects to adapt to the ecological environment, its shape and function can be changed.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **insect morphology**. Potential topics include, but are not limited to:

- External structure
- Internal structure
- Insect reproductive system
- Insect anatomy
- Body functions
- Evolution of insect morphology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Insect Morphology**” should be chosen during your submission.

According to the following timetable:

|                     |                |
|---------------------|----------------|
| Submission Deadline | July 4th, 2018 |
| Publication Date    | October 2018   |
