

Special Issue on Malaria

Call for Papers

Malaria is a life-threatening infectious disease of humans and animals caused by parasites, which is usually transmitted by the bites of infected female Anopheles mosquitoes. People with malaria often experience fever, fatigue, vomiting, chills, and headaches. Left untreated, they may develop severe complications or even cause death.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Malaria**. Potential topics include, but are not limited to:

- Plasmodium falciparum
- Antimalarial medications
- Cerebral malaria
- Algid malaria
- Serious complications
- Genetic resistance to malaria

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Malaria**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 30th, 2016
Publication Date	June 2016
