

Special Issue on Epidemiology and Infection

Call for Papers

Epidemiology is the study and analysis of the distribution (who, when, and where), patterns and determinants of health and disease conditions in defined populations. “Epidemiology and Infection” studies the causes and distribution of infectious diseases in populations

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Epidemiology and Infection**. Potential topics include, but are not limited to:

- Epidemiological methods
- Statistical analysis and mathematical modelling
- Disease surveillance
- Pattern of the diseases
- Pathogen epidemiology
- Transmission and outbreak investigation
- Epidemiology and public health
- Risk factors and preventions
- Environmental epidemiology
- Screening and biomonitoring
- Population-based health management
- Social dimensions of infectious diseases
- COVID-19 and epidemiology

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – *Epidemiology and Infection***” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 24th, 2021
Publication Date	June 2021
