

Special Issue on Malaria Research

Call for Papers

Malaria is a mosquito-borne infectious disease that affects humans and other animals. It is caused by single-celled microorganisms of the Plasmodium group. The disease is widespread in the tropical and subtropical regions that exist in a broad band around the equator.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Malaria Research**. Potential topics include, but are not limited to:

- Treatment and prevention
- Malaria and public health
- Molecular and genomic epidemiology
- Molecular biology
- Malaria indicators survey
- Malaria control and elimination
- Artemisinin-based combination therapy
- Vaccine development
- Pathogenesis
- Antimalarial drug resistance
- Malaria in pregnancy
- Malaria and co-infections
- Plasmodium falciparum malaria

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Malaria Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 29th, 2022
Publication Date	December 2022
