# Advances in Internet of Things (AIT)

<http://www.scirp.org/journal/ait>

Advances in Internet of Things is an international journal dedicated to the latest advancement of wireless engineering and technology. The goal of this journal is to provide a platform for scientists, students, academics and engineers all over the world to promote, share, and discuss various new issues and developments in different areas of Advances in Internet of Things.

## Editor-in-Chief

Prof. Ammar Rayes

San Jose State University, USA

## Subject Coverage

The aim of the Advances in Internet of Things is to provide a forum for scientists and social workers to present and discuss issues in the impact of the Internet to the society and disseminate findings in scientific research on related subjects. The scope of the journal includes but is not limited to:

Classification Methods	Mobile Ad Hoc Network (MANET) and Sensor Networks
Computer Vision	Networking Protocols
Digital Libraries	Neural Computing
Gateway between Databases and Security	Online Document Processing
Home Networking	P2P Networking and System
Image Processing	Securing Information Technology
Information Forensics, Information Security, Biometrics and Systems	Smart Grid
Applications that Incorporate These Features	Text and Graphics Recognition
IP Multimedia Subsystem (IMS)	Web Services
IPTV	
IPTV Platform and Standards	
IPv6	

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the *AIT*.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
