Advances in Internet of Things is an international journal dedicated to the latest advancement of wireless engineering and technology. The goal of this journal is to provide a platform for scientists, students, academics and engineers all over the world to promote, share, and discuss various new issues and developments in different areas of Advances in Internet of Things.

## Editor-in-Chief

Prof. Ammar Rayes

San Jose State University, USA

## Subject Coverage

The aim of the Advances in Internet of Things is to provide a forum for scientists and social workers to present and discuss issues in the impact of the Internet to the society and disseminate findings in scientific research on related subjects. The scope of the journal includes but is not limited to:

Classification Methods

Computer Vision

Digital Libraries

Gateway between Databases and Security

Home Networking

Image Processing

Information Forensics, Information Security, Biometrics and Systems

Applications that Incorporate These Features

IP Multimedia Subsystem (IMS)

IPTV

IPTV Platform and Standards

IPv6

Mobile Ad Hoc Network (MANET) and Sensor Networks

Networking Protocols

Neural Computing

Online Document Processing

P2P Networking and System

Securing Information Technology

Smart Grid

Text and Graphics Recognition

Web Services

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the **AIT**.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
