## Special Issue on

## Material Structure and Morphology Analysis

### Call for Papers

Material Structure and Morphology Analysis is a pivotal area of materials science that focuses on understanding the internal organization and external shape of materials at various scales. This knowledge is crucial for optimizing material properties, enhancing performance, and designing novel materials for specific applications. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Material Structure and Morphology Analysis**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Material Structure and Morphology Analysis**. In this special issue, potential topics include, but are not limited to:

- Nanoscale structure and morphology
- Defect structure and morphology
- Surface and interface structure and morphology
- Structure-property relationships
- Fracture morphology
- Surface morphology
- Microstructure morphology
- Crystal morphology
- Particle morphology
- Ferrite morphology
- Pore morphology
- Sintering morphology
- Corrosion morphology
- Workpiece morphology
- Inclusion morphology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Material Structure and Morphology Analysis**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 26th, 2024
Publication Date	January 2025

**Guest Editor:**
