

TABLE OF CONTENTS

Volume 3 Number 1A

April 2013

De Sitter Space as a Computational Tool for Surfaces and Foliations

M. Czarnecki, K. Geometrii, S. Walczak.....1

The m -Point Quaternary Approximating Subdivision Schemes

S. S. Siddiqi, M. Younis.....6

On Constructing Approximate Convex Hull

M. Z. Hossain, M. A. Amin.....11

Fitting of Analytic Surfaces to Noisy Point Clouds

O. Ruiz, S. Arroyave, D. Acosta.....18

Overlapping Nonmatching Grid Method for the Ergodic Control Quasi Variational Inequalities

H. Mécheri, S. Saadi.....27

The figure on the front cover is from the article published in American Journal of Computational Mathematics, 2013, Vol. 3, No. 1A, pp. 1-5 by Maciej Czarnecki, Katedra Geometrii and Szymon Walczak.
