

# Table of Contents

Volume 4    Number 3

June 2014

<b>A Five-Step P-Stable Method for the Numerical Integration of Third Order Ordinary Differential Equations</b> D. O. Awoyemi, S. J. Kayode, L. O. Adoghe.....	119
<b>Nonlinear Interaction of <math>N</math> Conservative Waves in Two Dimensions</b> V. A. Miroshnikov.....	127
<b>Effects of Hall Current on MHD Boundary Layer Second-Order Viscoelastic Fluid Flow Induced by a Continuous Surface with Heat Transfer</b> H. Zaman, M. A. Shah, F. Khan, Q. Javed.....	143
<b>Supersonic Flutter of a Spherical Shell Partially Filled with Fluid</b> M. Menaa, A. A. Lakis.....	153
<b>Combining Symbolic Tools with Interval Analysis. An Application to Solve Robust Control Problems</b> I. Ferrer-Mallorquí, J. Vehí.....	183
<b>Variations of Enclosing Problem Using Axis Parallel Square(s): A General Approach</b> P. R. S. Mahapatra.....	197
<b>Compact Extrapolation Schemes for a Linear Schrödinger Equation</b> X. L. Yin.....	206
<b>Modified Tikhonov Method for Cauchy Problem of Elliptic Equation with Variable Coefficients</b> H. W. Zhang.....	213
<b>Numerical Solution of Blasius Equation through Neural Networks Algorithm</b> I. Ahmad, M. Bilal.....	223
<b>Blind Signal Processing in Telecommunication Systems Based on Polynomial Statistics</b> O. Goryachkin, A. Berezovskiy.....	233
<b>An Iterative Method for Solving Two Special Cases of Lane-Emden Type Equation</b> P. P. Cárdenas Alzate.....	242
<b>Interaction of Two Pulsatory Waves of the Korteweg-de Vries Equation in a Zigzag Hyperbolic Structure</b> V. A. Miroshnikov.....	254
