

## Special Issue on Research on Alloy

### Call for Papers

An **Alloy** is considered as a substance made by melting two or more elements together, at least one of them a metal. It crystallizes upon cooling into a solid solution, mixture, or intermetallic compound. An alloy has significant attention and interests in recent years in a broad range of commercial applications, due to its unique and superior properties, while this commercial development has been supported by fundamental and applied research studies. This special issue will be focused on studying different kinds of **alloys** and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **research on alloy**. Potential topics include, but are not limited to:

- Shape memory alloy
- Metal-ceramic materials
- Nano-crystalline metals
- All types of alloy
- Properties of alloy
- Processing technology of alloy
- Development of alloy
- Applications of alloy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Research on Alloy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 29th, 2014
Publication Date	December 2014

#### Guest Editor:

Prof. **Zhiwen Chen**  
Shanghai University, China

**Scientific Research**  
*Open Access*

**Advances in Materials**  
**Physics and Chemistry**  
ISSN Online: 2162-5328
