

Special Issue on Phase Equilibrium and Transformation

Call for Papers

Phase equilibrium is the state of balance between two phases of a molecule. It occurs when the transfer of matter or heat energy from one phase to another phase is equal to the rate of transfer of matter or heat energy in the reverse direction. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of phase equilibrium and transformation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **phase equilibrium and transformation**. Potential topics include, but are not limited to:

- Phase rule
- Phase diagram
- Phase change
- Dynamic equilibrium
- Polyphase system
- Phase theory
- Application of phase

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Phase Equilibrium and Transformation**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 6th, 2017
Publication Date	June 2017
