

Table of Contents

Volume 5 Number 4

March 2014

Increase Throughput of CCM Security Mode Using MKP

Z. A. Zukarnain.....581

Numerical Solutions for the Time-Dependent Emden-Fowler-Type Equations by B-Spline Method

M. El-Gamel, W. El-bashbasy, A. El-Shenawy.....593

A Comparison of Spillover Effects before, during and after the 2008 Financial Crisis

A. Rea, W. Rea, M. Reale, C. Scarrott.....601

Transfer of Global Measures of Dependence into Cumulative Local

B. Dimitrov, S. Esa, N. Kolev, G. Pitselis.....615

Causal Groupoid Symmetries

S. Pissanetzky.....628

The Generalized Search for a Randomly Moving Target

A. A. M. Teamah.....642

Further Results about Calibration of Longevity Risk for the Insurance Business

M. Coppola, V. D'Amato.....653

Four Color Theorem and Applied Geophysics

Lev V. Eppelbaum.....658

Continuous Piecewise Linear Approximation of BV Function

H. Yi, T. Yu, Z. Q. Chen, J. W. Zhu.....667

Lattices Associated with a Finite Vector Space

M. T. Yue.....672

Improve Results for Set Identities

Y. H. Liu.....677

Project Scheduling Problem with Uncertain Variables

L. Lin, T. Lou, N. Zhan.....685

A Consecutive Quasilinearization Method for the Optimal Boundary Control of Semilinear Parabolic Equations

M. D. Nayyeri, A. V. Kamyad.....691

A General Model for Hepatitis B Disease with Age-Dependent Susceptibility and Transmission Probabilities

D. D. E. Houpa, T. E. Miamdjo, T. Y. Kouakep.....707

On Classification of k-Dimension Paths in n-Cube

G. G. Ryabov, V. A. Serov.....723

An Infinite Elastic Plate Weakened by a Generalized Curvilinear Hole and Goursat Functions

M. A. Abdou, A. R. Jan.....728

Common Fixed Point Results for Occasionally Weakly Compatible Maps in G-Symmetric Spaces

K. S. Eke, J. Olaleru.....744

Chebyshev Polynomials for Solving a Class of Singular Integral Equations

S. M. Dardery, M. M. Allan.....753

Nelson-Aalen and Kaplan-Meier Estimators in Competing Risks

D. A. Njamen-Njomen, J. Ngatchou-Wandji.....765

On Relations between the General Recurrence Formula of the Extension of Murase-Newton's Method (the Extension of Tsuchikura-Horiguchi's Method) and Horner's Method

S. Horiguchi.....777
