

Table of Contents

Volume 11 Number 3

March 2020

Global Sensitivity Analysis in Physiological Systems

T. Azizi, R. Mugabi.....119

Numerical Discrete-Domain Integral Formulations for Generalized Burger-Fisher Equation

O. O. Onyejekwe, B. Minale, F. Habtamu, T. Amha, G. Tamiru, B. Mengistu, Y. Demiss, N. Alemseged,
Computational Science and Dynamics Systems Group.....137

A Mathematical Model for Redshift

P. Y. P. Chen.....146

A Mathematical Model of the Cell Differentiation in Multicellular Eukaryotes

J. Otsuka.....157

Numerical Calculations for a Boundary Layer Flow past a Moving Vertical Porous Plate with Suction/Injection and Thermal Radiation

O. O. Onyejekwe, Y. D. Belete, N. A. Worku.....172

Solution of Stochastic Van der Pol Equation Using Spectral Decomposition Techniques

M. Hamed, I. L. El-Kalla, M. A. El-Beltagy, B. S. El-desouky.....184

The Phenomenon of Neural Bursting and Spiking in Neurons: Morris-Lecar Model

T. Azizi, R. Mugabi.....203

Deriving CDF of Kolmogorov-Smirnov Test Statistic

J. Vrbik.....227

Extended Wiener Process in Nonstandard Analysis

S. Kanagawa, K. Tchizawa.....247

Modeling Anthrax with Optimal Control and Cost Effectiveness Analysis

S. Osman, D. Otoo, O. D. Makinde.....255
