Special Issue on Number Theory

Call for Papers

Number theory (arithmetic) is devoted primarily to the study of the integers. It is sometimes called "The Queen of Mathematics" because of its foundational place in the discipline. Number theorists study prime numbers as well as the properties of objects made out of integers (e.g., rational numbers) or defined as generalizations of the integers (e.g., algebraic integers).

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **number theory**. Potential topics include, but are not limited to:

- Algebraic integers
- Analytic number theory
- Particular, analytic and algebraic number theory
- Diophantine geometry
- Probabilistic number theory
- Computations in number theory
- Applications of number theory

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** – *Number Theory*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 11th, 2018
Publication Date	March 2018
