**November 2018**

|                                                                                                                                                                       |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Effects of Wheat-Faba Bean Intercropping on Soil Microbial Community Structure in the Rhizosphere</b>                                                              |      |
| Y. B. Xu, B. K. Lei, Y. F. Tang.....                                                                                                                                  | 1389 |
| <b>Economic Benefits of Supplemental Irrigation in Uganda</b>                                                                                                         |      |
| F. Kimera, H. Sewilam, E. Imam.....                                                                                                                                   | 1401 |
| <b>Research and Analysis of the Sino-US Agricultural Trade in Current Decade</b>                                                                                      |      |
| X. J. Wang, J. Pan, J. L. Hu.....                                                                                                                                     | 1419 |
| <b>Forecast Grain “Three Quantities” Based on Grey GM (1, 1) and Promote the Structural Reform of Grain Supply Side</b>                                               |      |
| B. J. Li, X. X. Zhu.....                                                                                                                                              | 1432 |
| <b>Preliminary Evaluation of New Quinoa Genotypes under Sandy Soil Conditions in Egypt</b>                                                                            |      |
| A. S. Shams.....                                                                                                                                                      | 1444 |
| <b>Chemical Basis for the Phytotoxicity of Indoles in Relation to the Allelopathy of Cereals</b>                                                                      |      |
| H. R. Bravo, S. Copaja.....                                                                                                                                           | 1457 |
| <b>Use of Observed Genomic Information to Infer Linkage Disequilibrium between Markers and QTLs</b>                                                                   |      |
| E. H. Hay, R. Rekaya.....                                                                                                                                             | 1470 |
| <b>Dry Matter Production and Nutritional Status of Sunflower Grown in Nutrient Solution under Macronutrient Omission</b>                                              |      |
| A. N. Alves, F. G. de Souza, L. H. G. Chaves, A. C. F. de Vasconcelos.....                                                                                            | 1479 |
| <b>Effects of Supplementation with Increasing Levels of Energy Concentrate on the Productive Response and Ruminal Digestion of Dairy Cows Grazing Lucerne Pasture</b> |      |
| E. E. Salado, G. Bretschneider, A. Cuatrin, G. A. Gagliostro.....                                                                                                     | 1487 |
| <b>Suspensions Derived from Anaerobically Fermented Tilapia Offal Inhibit <i>Fusarium oxysporum</i> f. sp. <i>cubense</i> in Banana</b>                               |      |
| Y. H. Zhou, Y. L. Liu, Q. F. Lv.....                                                                                                                                  | 1506 |
| <b>A Miniature Sensor for Measuring Reflectance, Relative Humidity, and Temperature: A Greenhouse Example</b>                                                         |      |
| R. S. Fletcher, D. K. Fisher.....                                                                                                                                     | 1516 |
