

Special Issue on Agricultural Systems Modelling

Call for Papers

To make agriculture more sustainable, new crop systems must be developed that meet the widest-possible array of economic, environmental, and social objectives. Modelling has become an indispensable tool for recognizing, understanding, developing, and sharing these new production strategies.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **agricultural systems modelling**. Potential topics include, but are not limited to:

- Agricultural systems
- System dynamics
- Crop modelling
- Software
- Model development
- Integrated modeling
- Model testing and simulation
- Application and innovation

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Agricultural Systems Modelling**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 29th, 2016
Publication Date	August 2016
