

## Special Issue on Wheat

### Call for Papers

**Wheat** provides 20 percent of the calories and protein people consume globally. An estimated 80 million farmers in the developing world rely on wheat for their livelihoods. The crop is at risk from new and more aggressive pests and diseases, diminishing water resources, limited available land and unstable weather conditions related to climate change.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **wheat**. Potential topics include, but are not limited to:

- Wheat genomics
- Physiology and disease research
- Wheat breeding
- Production
- Soil management
- Weed management
- Insect management
- Irrigation/Water
- Value added/Organic
- Marketing/Economics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Wheat**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 20th, 2016
Publication Date	February 2017
