

Special Issue on Fruits and Agriculture

Call for Papers

Fruits are defined as a product of vegetable growth edible to humans, such as the developed ovary of a seed plant with its contents and accessory parts, which includes the pea, pod, nut, tomato and pineapple. A fruit may also be the edible part of a plant developed from a flower with its accessory parts, such as the apple, lemon and peach. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **fruits and agriculture**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **fruits and agriculture**. In this special issue, potential topics include, but are not limited to:

- Fruit farming
- Fruit cultivation techniques
- Fruit fresh keeping
- Fruit storage and transportation
- Fruit and health
- Fruit nutritional value

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fruits and Agriculture**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 29th, 2017
Publication Date	January 2018
