

Special Issue on Poultry and Livestock

Call for Papers

Poultry and livestock are directed to improving food and nutrition security through increased production and access to animal-source foods; stimulating economic development and poverty reduction through enhanced livestock value chains and increased productivity; improving human health through improved access to animal-source foods and a reduction in the burden of zoonotic and food-borne diseases; and managing the adaptation of livestock systems to climate change and mitigating the impact of livestock on the environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **poultry and livestock**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **poultry and livestock**. In this special issue, potential topics include, but are not limited to:

- Poultry and livestock nutrition
- Poultry and livestock breeding and genomics
- Poultry and livestock health and welfare
- Poultry and livestock farming
- Transportation and marketing
- Economic and social benefits
- Livestock systems and environment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Poultry and Livestock**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 26th, 2018
Publication Date	June 2018
