

Special Issue on Agricultural Engineering

Call for Papers

Agricultural engineering focuses on the agricultural production and processing that applies engineering technology and biological science to agriculture. Agricultural engineers design agricultural machinery, equipment and structures; develop methods to conserve soil and water; and research ways to improve how agricultural products are processed. The goal is to improve the efficacy and sustainability of agricultural practices.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Agricultural Engineering**. Potential topics include, but are not limited to:

- Agricultural machinery
- Agricultural resource management
- Livestock production
- Crop production
- Waste management
- Food engineering
- Bioresource engineering
- Farming, harvesting, and storage

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Agricultural Engineering**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 12th, 2018
Publication Date	December 2018
