

Special Issue on Breeding Industry

Call for Papers

Farm animal breeding is the activity in farm animal production providing the next generation of farm animals. Animal breeding ensures a continuous improvement of farm animals, generation after generation. Different animal traits are measured and the best animals are used as parent-animals. In this way, breeders provide livestock farmers with a next generation of animals. Farm animal breeders have an essential contribution to a healthy and sustainable food supply chain. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **breeding industry**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **breeding industry**. In this special issue, potential topics include, but are not limited to:

- Animal breeding and reproduction
- Chicken breeding
- Bee breeding
- Silkworm breeding
- Dairy farming
- Aquaculture
- Poultry production

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Breeding Industry**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 30th, 2020
Publication Date	March 2020
