

## Special Issue on Modern Seed Technology

### Call for Papers

Seed technology includes the development of superior crop plant varieties, their evaluation and release, seed production, processing, seed storage, seed testing, seed quality control, seed certification, seed marketing, distribution and research on seed these aspects. Seed production, seed handling based on modern botanical and agricultural sciences. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **modern seed technology** .

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **modern seed technology**. In this special issue, potential topics include, but are not limited to:

- Protect seed and seedlings from biotic and abiotic stress
- The seed quality of crops
- Role and goal of seed technology in crop production
- Seed dormancy and methods of breaking seed dormancy
- Seed movement, germination requirements
- Seed processing and storage
- Seed physiology, pathology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Modern Seed Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 30th, 2020
Publication Date	February 2021
