

## Special Issue on Agricultural Production

### Call for Papers

Productivity measures the quantity of output produced with a given quantity of inputs. Long term productivity growth reflects improvements in farmers' production efficiency and technological progress. Improving productivity on farms contributes to profitability and competitiveness because it allows farmers to produce more output using fewer inputs. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Agricultural Production**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Agricultural Production**. In this special issue, potential topics include, but are not limited to:

- Productivity, efficiency and resilience of crop
- Productivity, efficiency and resilience of livestock
- Productivity and efficiency measurement in agriculture
- Determinants of productivity and efficiency
- Sources of agricultural productivity
- Economic sustainability of agriculture
- Government policy and agricultural production

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - Agricultural Production**" should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 16th, 2021
Publication Date	August 2021
